# Transformation 16

- **DNA** stands for **d**eoxyribo**n**ucleic **a**cid.
- The structure of DNA can be likened to a twisted ladder.
- The rungs of the ladder are made up of “bases”
- There are approximately 3 billion (3,000,000,000) chemical letters (otherwise known as bases) in the DNA code in every cell in your body.

# Transformation 16

- If unwound and tied together, the strands of DNA in one cell would stretch almost six feet but would be only 50 trillionths of an inch wide.
- If all the DNA in your body was put end to end, it would reach to the sun and back over 600 times (100 trillion times six feet divided by 92 million miles).

# Transformation 16

- It would take a person typing 60 words per minute, eight hours a day, around 50 years to type the human genome.
- If all three billion letters in the human genome were stacked one millimetre apart, they would reach a height 7,000 times the height of the Empire State Building.
- Our entire DNA sequence would fill 200 1,000-page telephone directories.

# Transformation 16

- Humans have roughly 100,000,000,000,000 (100 trillion cells).
- Chromosomal or nuclear DNA is DNA found in the nucleus of cells.
- Humans have 46 chromosomes.

# Transformation 16

- Sections of DNA that code for proteins are called genes. The complete set of genetic information for an organism 20,000-25,000 genes is called the genome.
- Genes are pieces of DNA passed from parent to offspring in their chromosomes that contain hereditary information.

# Transformation 16

- On average, each chromosome has about 65 million DNA molecules.
- Between genes, along the length of a chromosome, there are long stretches of DNA, which have no known function.
- A chromosome contains about 1000 genes.
- Humans have approximately 30,000 different genes spread out over the 46 chromosomes.

# Transformation 15

- Our 46 chromosomes are arranged in 23 pairs.
- We inherit one copy of the pair from our Mum and one from our Dad.
- Identical twins share 100% of their genes.
- Siblings share 50% of their genes.
- A parent and child share 50% of their genes.

# Transformation 16

- You get half your genes from your mum and half from your dad, just as they got half each from their parents, and back and back generation upon generation.
- You carry a record of all past generations back to Adam and Eve

# Transformation 16

- Science tells us that we only use 2% of our DNA and 98% is considered junk or alien DNA because they couldn't figure out what it is for.
- DNA is not only responsible for the construction of our body, but also serves as data storage and in communication.
- Cells have memory

# Transformation 16

- Russian scientists found that the genetic code, especially in the apparently useless 97%, follows the same rules as all our human languages.
- Compared the rules of syntax (the way in which words are put together to form phrases and sentences) and semantics (the study of meaning in language forms) and the basic rules of grammar.

# Transformation 16

- By exposing DNA to sound frequency patterns on a laser beam they influenced the DNA frequency and thus the genetic information itself.
- By simply applying sound vibration and language through light, the human body can be programmed by language, words and thoughts
- Living DNA substance will always react to language programmed on modulated laser rays and even to radio waves, if the proper frequencies are being used.

# Transformation 16

- Depression, grief, sadness, anger, negativity and unforgiveness actually program our DNA to produce sickness and disease
- Praise, joy, peace and forgiveness can program our DNA to produce healing, health and wholeness
- Healing anointed prayer and laying on hands release frequencies that can repair and reprogram our DNA

# Transformation 16

- Healing
- Sound and frequencies applied can re-sequence DNA patterns
- Speaks words of faith, play sounds of heaven, lay hands vibrating with heat and power
- Faith to change and call things back into wholeness

# Transformation 16

- Matter is never destroyed, it just changes form
- Call it back into existence
- Lost limbs
- Lost hair
- Tumours - even fat - direct it to change form and dissipate

# Transformation 16

- Healing power
- Mix the grace of God (divine enabling strings of power) that exists in the fabric of our beings at a sub-atomic quantum level with faith filled words of agreement to produce anointing.
- Resonant frequency to change, even at a DNA genetic level

# Transformation 16

# Transformation 16

- Genetic factors waiting for triggers are not an excuse for licence
- God always makes a way to escape
- There is a solution: to be transformed from the genetic factors
- To be conformed to the image and DNA of God
- To be restored to wholeness

# Transformation 16

- Sequences of DNA called mini-satellites, that contained repeating patterns with no known function

# Transformation 15

- John 6:53 So Jesus said to them, “Truly, truly, I say to you, unless you eat the flesh of the Son of Man and drink His blood, you have no life in yourselves. 54 He who eats My flesh and drinks My blood has **eternal life**, and I will raise him up on the last day. 55 For My flesh is true food, and My blood is true drink. 56 He who eats My flesh and drinks My blood abides in Me, and I in him. 57 As the living Father sent Me, and I live because of the Father, so he who eats Me, he also **will live** because of Me. 58 This is the bread which came down out of heaven; not as the fathers ate and died; he who eats this bread will **live forever**.”
